What Is a Component?

Where Do We Put the Html?

Inline Template

```
template:
"<h1>{{pageTitle}}</h1>"
```

Inline Template

Linked Template

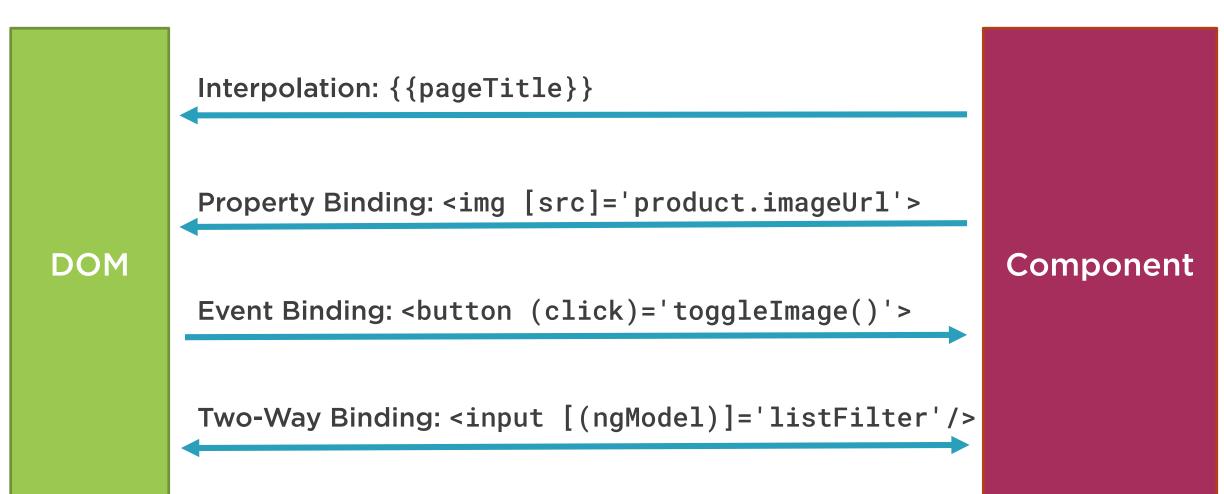

```
templateUrl:
'./product-list.component.html'
```

ES 2015 Back Ticks

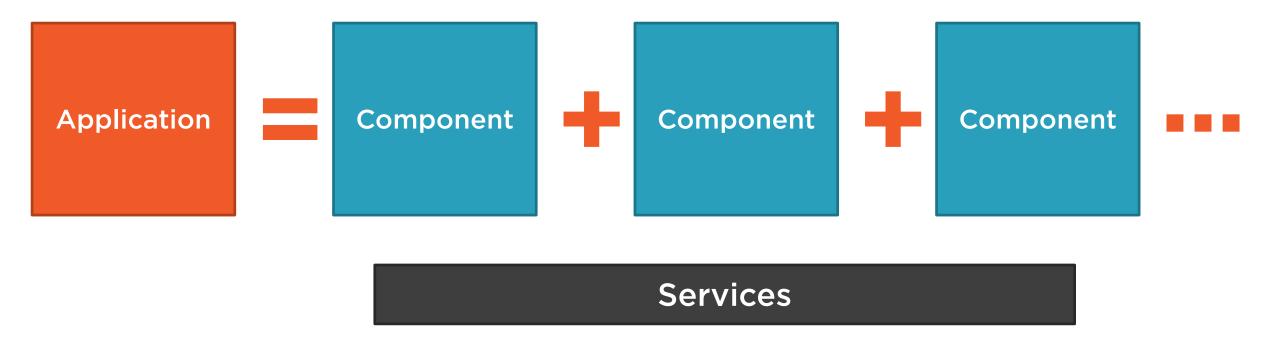

When Should We Use Data Binding?

Why Do We Need a Service?

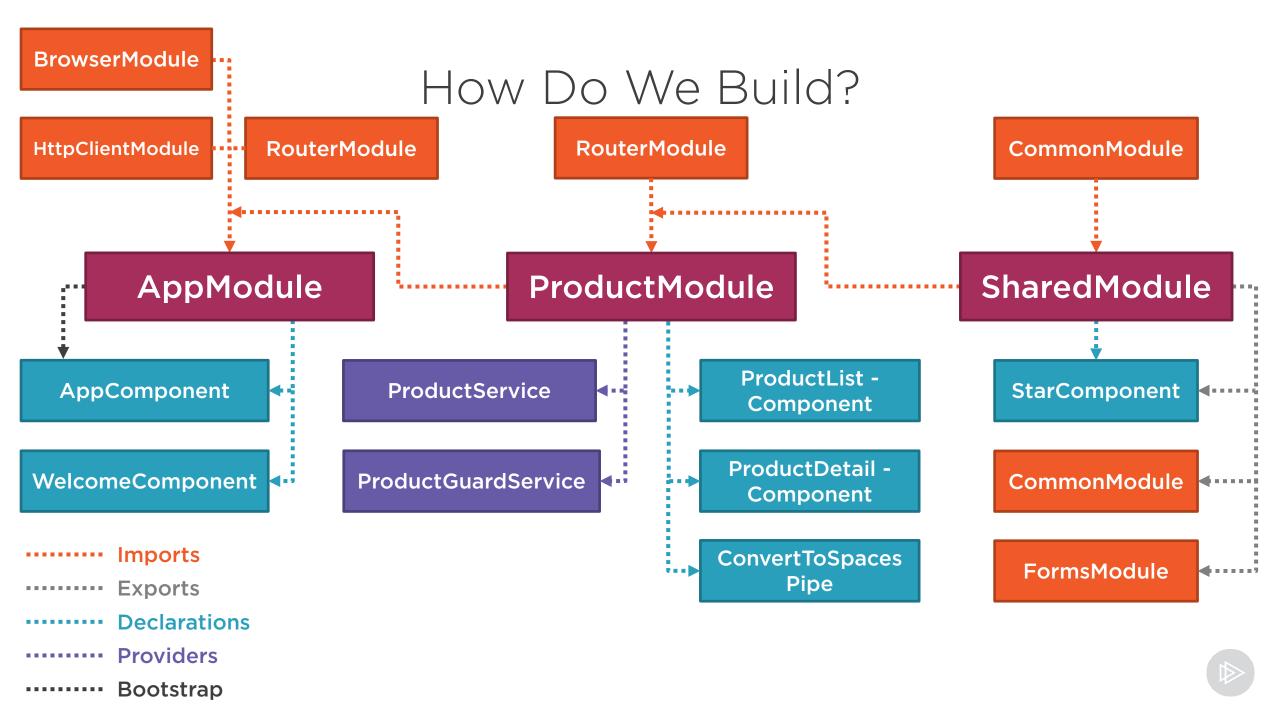

How Do We Build?

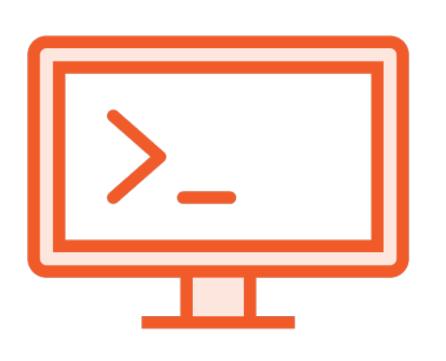

product-list.component.ts

```
import { Component } from '@angular/core';

@Component({
    templateUrl: './product-list.component.html',
    styleUrls: './product-list.component.css'
})
export class ProductListComponent {
    pageTitle: string = 'Product List';
}
```

Angular CLI

```
ng new
ng serve
ng generate
ng test & ng e2e
ng build
```
